

Cyber COPE Insurance Certification® (CCIC®)

CCIC alumni share insight on their experience during this intensive eight-month program developed and delivered by Chubb and Carnegie Mellon University to provide Chubb's broker and agent partners with an understanding of industry best practices in cyber security risk management, governance, and operations

Share your knowledge

Not every organization's insurance applications and coverage needs are going to look the same. Therefore, neither will their risk management programs. With a deeper understanding of cyber insurance products and services, you can help your clients build an extensive cyber risk management program that can limit future cyber losses, regardless of their organization's size or industry.

“The content shared throughout the CCIC program helps me have a better understanding of cyber security, [so I can] guide the discussion with clients and CISOs. [I'm able] to explain the reasoning behind the questions in the insurance application in an understanding way, which greatly facilitates the process.”

Jean-Philippe Ouellet-Gagnon
EgR, Inc. (Canada)

Harness our data

With the Chubb Cyber IndexSM, you can access Peer Purchasing Insights^{*} data to help you provide clients with insight into what other organizations are purchasing in regard to primary policy limits and deductibles.

“[I have a] heightened understanding of past breaches and their costs, making me much better equipped to address one of the biggest asks of my clients, which is that there is not a ‘right’ answer to purchase limits.”

Mary Castiglia
HUB International

Expand your network

Maintaining and expanding your network with a range of professionals like insurance underwriters, risk managers and educators provides a well-rounded cyber perspective into the world brokers and agents play a key part in.

“I believe the partnership [between Chubb and Carnegie Mellon] allowed both organizations to see outside of itself and its own regular areas of practice. This also allowed the attendees to see the world outside the sometimes myopic world of insurance.”

Edward Szylo
EJMS

Lead the conversation

Chubb's Agent Center offers a variety of resources, like educational videos and claims scenarios, to help you stay informed so you can help your clients stay ahead of cyber risks and emerging exposures.

“I am not getting lost anymore in cyber discussions, especially with ‘Techies’.”

Renata Gombos
Munich Re
